PROFESSIONAL SUMMARY

System Administrator and IT Infrastructure Engineer with 10+ years of experience in Windows and Linux administration, LAN/WAN networking, virtualization, remote device configuration, and surveillance/IoT infrastructure. Skilled in REST API-based network automation, root cause analysis, and ticket-driven support using Zendesk and monitoring tools. Experienced team lead with a record of reducing downtime and improving system reliability.

TECHNICAL SKILLS

Operating Systems: Windows and Linux installation, configuration, upgrades, patching and troubleshooting; user accounts, groups and permissions

Servers & Virtualization: Windows Server (ADDS, DHCP, DNS, WDS, IIS); Linux; VMware Workstation; virtual machines on NAS; RAID and NAS configuration

Networking: TCP/IP, DNS, DHCP, LAN/WAN, VLAN, trunk ports, inter-VLAN routing, static and dynamic routing, ACL, NAT; switches, routers, access points, client bridges, PoE injectors/extenders

Security & Remote Access: OpenVPN (PuTTY), VPN configuration, firewall and port forwarding, malware and ransomware removal

Hardware & Desktop Support: PC and laptop setup, hardware and software installation, upgrades, preventive maintenance, IT asset inventory and software licenses

Automation & DevOps: REST API automation (switch port control, port restart, scheduled actions), automation proof-of-concept projects, Jenkins, Docker, Python (basic), Ansible (basic), Terraform (basic), AWS (basic)

Monitoring & Ticketing: Zendesk, network monitoring and ticketing tools, root cause analysis (RCA), IT documentation

Surveillance & IoT: Surveillance system setup and network topology, IP cameras, NAS/NVR, IP speakers, strobes, web controllers (X-310, X-410), solar power systems (panels, inverter, charge controller, batteries)

Soft Skills: Team leadership, coaching and mentoring, communication, problem-solving, customer service, operations management

WORK HISTORY

Nov 2023 - Present

Application Team Lead

Pro-Vigil Surveillance Services, Visakhapatnam, India

- Lead an application support team responsible for network monitoring tools, network devices and automation solutions.
- Built REST API-based automation to remotely control network switches, including port disable/enable, port restart and scheduled actions, reducing manual intervention.
- Researched automation ideas and developed proof-of-concept projects, then handed them over to DevOps and Engineering teams for implementation.
- Designed automated workflows that streamlined processes, reduced downtime and improved system reliability.
- Resolved complex issues related to network devices and tracked tickets in Zendesk; performed Root Cause Analysis (RCA) to prevent recurrence.
- Collaborated with other department leads to improve workflows and interdepartmental coordination.
- Coached the team through regular feedback and skill development, and promoted teamwork and recognition.

Mar 2022 - Nov 2023

Technical Trainer

Pro-Vigil Surveillance Services, Visakhapatnam, India

- Assessed technical skills, identified training needs and built customized learning plans for different skill levels.
- Developed and delivered technical training modules and managed training schedules aligned to company goals.

- Evaluated training effectiveness through assessments and feedback surveys and improved course content accordingly.
- Worked with the video production team to create new training content for multiple distribution channels.

Mar 2021 - Mar 2022

Field Tech Support

Pro-Vigil Surveillance Services, Visakhapatnam, India

- Provided technical support for surveillance cameras, network switches, NAS devices, virtual machines and IT infrastructure.
- Performed remote troubleshooting and configuration of solar panel systems, NAS, virtual machines, switches, routers, IP cameras, hubs, web controllers (X-310, X-410), IP speakers and strobes.
- Worked with US-based technicians to resolve connectivity issues and keep operations running efficiently.
- Applied proactive maintenance to minimize downtime and trained new technicians on standard operating procedures.

Jul 2018 - Mar 2021

US IT Support

Pro-Vigil Surveillance Services, Visakhapatnam, India

- Configured and managed switches, routers, NAS devices, hubs, access points, client bridges and IP cameras, including remote installation and RAID configuration.
- Set up, configured and troubleshot virtual machines on NAS systems.
- Designed and maintained OpenVPN tunnels (using PuTTY) for secure remote access.
- Designed network topologies and resolved network outages in real time using static and dynamic routing, VLANs, trunk ports, inter-VLAN routing, ACLs, NAT and VPN.
- Managed Windows Server 2008/2010 environments (ADDS, DHCP, WDS, DNS, IIS) and configured firewall port forwarding.
- Used monitoring and ticketing tools (including Zendesk) to track and resolve issues, and maintained IT documentation for the team.
- Worked with AWS servers and Salesforce at a basic level.

Sep 2015 - Jul 2017

Desktop Support Engineer

Collector Office Washim, Washim

- Installed and troubleshot Windows and Linux operating systems; configured hardware, devices and software for employee workstations.
- Managed data network and server infrastructure and provided on-site and remote technical support to end users.
- Handled hardware and software upgrades, patches and preventive maintenance to optimize PC performance.
- Managed IT asset inventory and software licenses, and removed malware and ransomware from laptops and desktops.

2011 - 2014

EDUCATION

Bachelor of Engineering: Information Technology

Indian Institute of Technology and Management, Bangalore, Karnataka

CERTIFICATIONS & TRAINING

- Master in Network Administration - Jetking, Hyderabad
- Microsoft 98-349: Windows Operating System Fundamentals - Jetking, Hyderabad
- CCNA (Routing & Switching) training - Jetking, Hyderabad
- Windows Server training (6-month course) - Jetking, Hyderabad

LANGUAGES

English, Hindi, Marathi, Urdu
